superior delivery

PHD is known in the industry for exceptional delivery. Some units can be shipped in as little as one working day. Use this delivery schedule as a general guide for standard PHD units. Certain options and unit variations can increase delivery time. Ask your local distributor or PHD Customer Service representative to confirm delivery on critical requirements.

1-800-624-8511

IMPORTANT:

This schedule represents the number of working days under normal situations to process, assemble, and ship standard units from the day PHD receives an order from your local distributor. Consult PHD for deliveries on non-stock units, specials, non-standard platings, large quantities, or on specific critical items.

NOTE: Orders containing multiple product types are shipped at one time and are scheduled based on the longest lead time item. Partial shipments of shorter lead time items are made when requested on original order. Most PHD products are built to order. With our extremely quick deliveries, the order may be in production within 1 to 2 days of receiving your order. Please bear this in mind when changing, revising, or canceling an order.

DELIVERY MAY VARY BASED ON CURRENT WORKING CONDITIONS.
